

Emerging Digital Technologies (Level 4)

AR Furniture Selection

You have been asked to help find a new sofa that will fit in a room within your school. This room will act as a common room for S6 pupils.

Your task is to use Augmented Reality (AR) to find two different sofas that fit inside this room.

Key Information

Using an augmented reality app of your choice you should:

- Find two suitable sofas for the common room
- Provide a photograph of the common room without any AR
- Provide AR screenshots of each sofa in the common room

1. What AR tool will you use to view the sofas?

I will use the IKEA Place app.

2. What is the process of using your selected tool?

I will first find two suitable sofas that could be used in the common rooms. Once I have found them, I will then use AR to view them in the common room. Once I have them in position I will take screenshots.

Name: _____

3. Provide a picture of the space where the sofa will go.

Name: _____

4. Provide and describe AR screenshots of your chosen sofas.

Option 1	
Screenshot 1 Description: This is a picture of my first sofa from the front showing it in position.	
Screenshot 2 Description: This is a picture of my sofa from the back showing it against the wall.	

Option 2	
Screenshot 1 Description: This is my second sofa from the front. It takes up more space than my first sofa.	
Screenshot 2 Description: This is my second sofa from the side. It still fits nicely but takes up more space.
