

Name:

Headings and Paragraphs

BGE Computing Science - HTML

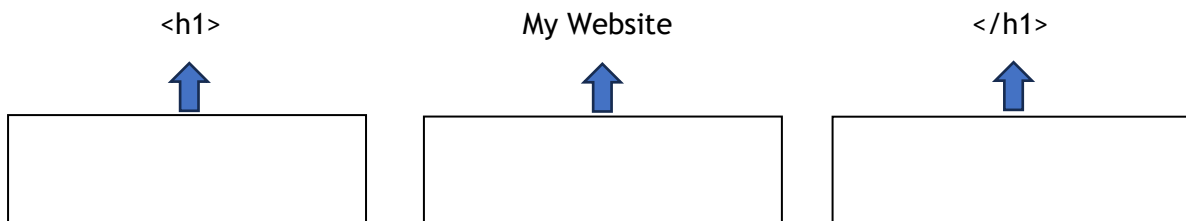

Targets

- Write HTML for a heading
- Write HTML code for a paragraph

Task 1

Label the code below using the terms **Content**, **Opening Tag** and **Closing Tag**.

Task 2

Complete the HTML code below by filling in the missing tags.

Opening Tag	Content	Closing Tag
<code><h1></code>	The Solar System	
	Mercury	<code></h2></code>
<code><p></code>	The planet closest to the Sun.	

Task 3

Draw how this code would look when viewed in a browser.

HTML Code	Browser
<pre><h1>Animals</h1> <h2>Lion</h2> <p> Lions are large cats that live in Africa.</p></pre>	

Task 4

Write the code that would create the webpage below.

HTML Code	Browser
	<p data-bbox="810 394 1075 439">Ancient Egypt</p> <p data-bbox="810 510 963 546">Pharaohs</p> <p data-bbox="810 566 1378 602">Pharaohs were the rulers of Ancient Egypt.</p> <p data-bbox="810 672 963 707">Pyramids</p> <p data-bbox="810 728 1302 790">Pyramids were built as tombs for the pharaohs.</p>

Task 5 - Take a Test

- Computing Science
- S1
- HTML

Percentage _____ %
